CITY OF CALAIS.

MAYOR'S ADDRESS

AND

ANNUAL REPORTS

OF THE SEVERAL
DEPARTMENTS OF THE CITY GOVERNMENT
FOR THE FINANCIAL YEAR

1908-1909

CALAIS, MAINE.
PRINTED AT THE TIMES OFFICE.
1900

MAR 5 1919

MAYOR'S ADDRESS.

GENTLEMEN OF THE BOARD OF ALDERMEN:

It has been the custom at the meeting for organization of the City Council each year, for the Mayor elect to communicate to the Board of Aldermen such information and recommendations in his judgment the interests of the city may require.

In pursuance of this custom, I will briefly give you what information I can regarding the city's affairs and recommend such measures as I deem for the best interests of the city.

I am pleased to greet here today so large a number of the members of the old Board who served with me during the past year. You did faithful service during your last term and I believe in all your official acts held ever in mind the welfare of the community. I confidently expect from you for the coming year as faithful service as rendered in the past, which, with your larger knowledge and experience, should render your present year's service more valuable to the city than the past.

To the two new members of the Board, I give a hearty welcome and from my knowledge of their character and ability, I feel sure that they will be in accord with us in our aim to administer the affairs of the city prudently and impartially.

In accepting the offices to which we have been elected,

and taking the oath of office prescribed by law, we have taken upon ourselves certain duties and obligations that can be rightly performed only by giving to the service the highest and best that is in us, and one of the first and most important duties is the attendance at the regular meeting of the Board. A member who is absent from a meeting has for the time being, in effect, abdicated his office and left his associates to perform his duties. During the past year the attendance at all the meetings has been unusually good, most of the time a full Board, and I trust there will be no backward step in that respect during the coming year. It is much more satisfactory to conduct business with a full Board when every ward is represented, where every member may be heard and his vote given on every question that arises, than with a bare quorum, when perhaps the members having the greatest knowledge and understanding of a matter to be decided, are absent.

This is the centennial year of the incorporation of our city as a town. One hundred years ago, in the summer of 1809, the plantation formerly known as Township No. 5 was by the General Court of Massachusetts, incorporated as the town of Calais. It is fitting for us to take note of this anniversary, and in some manner arrange for its commemoration. I make no special recommendation in regard to it at this time.

During the past year the various departments of the City Government have been well managed, except in this, that in some instances it does not seem that we get full value for the money expended. I trust that the committees in charge of the various departments will give very close attention to the expenditure of their appropriations and see to it that for every dollar of the city's money paid out, the city shall have a dollar's worth of service. No head of a department or officer of city, shall be allowed to contract bills of any kind except with the consent and ap-

proval of a committee of this Council, and I recommend the passage of an ordinance forbidding the Auditor to approve or place upon the monthly pay rolls of the city, any claim or account against the city, other than the salary or wages of regular officers or employees, whose salary or wages have been voted by the City Council, or fixed by a committee of the Council under authority granted it, unless approved by a majority of the committee having charge of the department of the city against which the claim or demand is a charge; and further forbidding the Auditor to pass for payment any claim or account either for supplies, salary or wages, when there is not an unexpended balance of the appropriation for the department of the city to which such claim or account is chargeable, sufficient to pay the same.

We have no legal right to pay out one dollar of the city's money in any department of the City Government, over and above the amount appropriated for that department. Let us make such appropriations as will, with careful, economical management, be sufficient for the needs of the various departments, and insist that expenditure shall cease when the appropriation is expended. I state squarely now, that I will not hereafter draw an order on the City Treasurer for the payment of any demand or claim against the city unless there is an unexpended balance of the appropriation for the department to which the claim or demand is chargeable sufficient to pay the same. It is, in my opinion, far better that bills against the city should be left for the next City Government to make appropriation for and pay, than that the loose methods of illegal payment of money not appropriated shall be continued.

There has been for a number of years friction between the street and fire departments, principally on account of the use, or non-use, of the men and horses, used partly by both departments. I believe that more efficient

service would be rendered by both departments if they are both placed under the jurisdiction of one committee that will have no special interest in one department as opposed to the other, and I recommend that hereafter the two departments named be placed in charge of one committee.

The Highway department is always the hardest problem the Council has to deal with, embracing as it does the various subdivisions of streets, sidewalks, bridges and sewers, on any one of which—perhaps with the exception of bridges—the entire appropriation for all could easily be expended to the great benefit and improvement of the city. Unfortunately, we cannot afford to appropriate for this department the amount really needed to build and keep our streets, sidewalks and sewers in such a manner as we would all like to see them. So we must by careful management make the little at our disposal, suffice.

The State Highway law, under which we built our section of State road last year, and under which we receive seventy-five cents for every dollar of city money we expend is a great help. The help toward good roads is greater than the mere money we receive. It compels us to expend a certain portion of our highway money on permanent improvements of a section of our streets each year, and if continued, will gradually give us streets of which we need not be ashamed. If the money that has been expended in building, rebuilding and repairing wooden sewers, sidewalks and culverts, had been used for tile or concrete sewers, cement or concrete sidewalks, and iron or cement culverts, we would not today have to face the question of repairing or rebuilding these broken down adjuncts to our highways. The only thing we can do is to gradually replace them with the better and more lasting material.

In addition to the ordinary necessary repairs to the streets this coming season, there are some of the old sewers that it seems absolutely necessary to rebuild, and what we

would very much desire to use in extension of the sewerage system, we must use for the purpose of rebuilding, and I recommend that what is rebuilt shall be made as permanent and fit for the service required of it, as possible.

The curbing to our sidewalks on the principal streets of the city, except the small portion of cement and stone curbing already built, is in a very delapidated condition and something must be done to remedy this condition during the present year. The length of old rotten wooden curbing on these streets that needs replacing is about 3200 ft. To replace with cement curbing well set, on a good foundation, will cost a large sum, but in my opinion it is a necessity. The sidewalks themselves are disintegrating for want of proper curbing, and it would be false economy to attempt to patch them up to stand another year. Every visitor to our city notes the dilapidated condition of these sidewalks on our principal streets, and is liable to carry away a false impression of the condition of business and affairs in our municipality. Let us economize in other directions that this condition may be remedied.

The City Engineer is now making an estimate of the cost of this work, which I will present to you for your consideration at an early date, with such other information and estimates I may be able to gather.

The City Council has the right to assess not exceeding one half the cost of building new curbing on the abutting land owners, and in my judgment assessment should be made for a proportion of the cost of all such improvements on the property, specially benefitted thereby. I think it a mistaken policy to pay for all street, sewer and sidewalk building wholly from the general funds of the city. The owners specially benefitted should pay a portion of the cost. In nearly all cities in this and other States, assessment is made for such improvements and in a great majority of them, for the whole cost.

I refer you to the report the commissioner for detailed

information as to the work done during the past year and recommendations for the coming years.

I believe our common schools and High school, are now doing good work and it is our duty to make such appropriation for them as will enable them to maintain a standard at least as high as at present. The movement on foot to form a school union with one or more near-by towns, if consummated, I believe will result in improvement without additional expense to the city. I believe there are no extensive alterations or repairs required this year on any of the school buildings.

The poor and insane department has been well and economically managed during the past year, but I believe we have some inmates of the poor farm who should be either in the Insane Asylum or in the school for Feeble Minded. I recommend that you investigate this matter with a view to taking such action as may be deemed proper. On January 1st next, the State takes on the entire charge and bears the expense of keeping all the insane, so that I think our appropriation for the insane for the present year can be somewhat reduced from former years, and hereafter entirely omitted.

The system of paying the members of the police force and adding the fees accruing to them to the police appropriation, adopted last year, has worked well in practice, but the amount received for fees fell short of the estimates and that accounts for the overdraft in that department. I recommend the continuance of this system and the passage of an ordinance providing a method of accounting between the City Marshal or Judge of the Municipal Court, and the City, regarding the fees collected.

For information relating to the departments not above mentioned, I refer you to the reports of the various heads of departments and city officials.

There is one other important matter I wish to call to

your attention, and that is the manner of auditing and paying the city's bills. Under the present system the City Council, as a whole, has had no knowledge of what is paid, or what it is paid for, except the amounts as reported by the Auditor. It is the right of the whole Council to know not only the amounts that are paid by the various departments each month, but also what the payments are for. From investigation of the methods pursued in other cities, I learn that in many of them the monthly payrolls are presented to the Council at its monthly meetings for their examination, and payment made only by vote of the Council. I believe this method is an improvement over our present mode, and I recommend this matter to your careful consideration, with the view of adopting some such method, that will keep the Council better informed as to the city's expenditures and the standing of the various appropriations. and also give the whole Council an opportunity of investigating the claims and demands against any or all of the departments.

The law obliges municipal corporations to make fortnightly payments to its laborers; were it otherwise, I would advocate the abolition of the fortnightly payment system. It benefits nobody, simply makes extra work and encumbers our books with unnecessary detail.

I believe that a sinking fund should be established for the purpose of providing for the gradual payment of the City's indebtedness. I have been requested by several citizens to urge upon you the necessity of taking action in this matter. I think it would be wise to make a beginning this year, if it can be done without making the rate of taxation unreasonably high. Some years ago a sinking fund was established, and \$2,000 appropriated for the same, but it was abandoned the next year. I think this was a mistake. I do not believe our citizens would object to raising a reasonable amount each year for the purpose

of placing the city's finances on a sounder basis. I commend this subject to your careful consideration.

And now in closing, I will only say, let us be diligent, prompt and faithful in the performance of our duties, giving to the business in hand the same care and attention we would bestow upon our own private affairs, and we can surrender our offices at the close of the year with the consciousness that while we may not have accomplished great things, we have rendered as efficient service as we are capable of.

I recommend the following appropriations for the year:

Highways, including sidewalks	. . .	\$7,000.00
State Highway	. . .	336.50
Sewers	. . .	500.00
Bridges	. . .	500.00
Common Schools	. . .	4,250.00
Common Schools interest on school fund	. . .	45.00
Free High School	. . .	2,750.00
Free High School janitor and fuel	. . .	300.00
Free text books	. . .	700.00
School repairs	. . .	600.00
Supplies, insurance and cleaning	. . .	1,100.00
Lighting streets	. . .	3,000.00
Fire department	. . .	2,900.00
Discount and abatement	. . .	2,200.00
Water supply	. . .	3,760.00
Police	. . .	2,200.00
Salaries	. . .	4,200.00
Interest	. . .	5,500.00
Insane	. . .	2,200.00
Poor	. . .	3,000.00
Library	. . .	850.00
Cemetery	. . .	800.00
Cemetery Red Beach	. . .	25.00
Election expenses	. . .	300.00
Contingent	. . .	3,000.00

Total, \$52,016.50

WILLIAM J. FOWLER, Mayor.

FRANK V. LEE, City Treas.

Report of Street Commissioner.

Year Ending March 31, 1909

TO THE HON. MAYOR AND BOARD OF ALDERMEN:

Gentlemen:—I herewith beg to submit the following report of the work done in this department for the year ending March 31, 1909.

At the first of the season all of the streets were given a thorough cleaning and ditching. This work cost \$750.00.

The Baring road was turnpiked the full length, the bushes were all cut and cleared away, one Iron culvert put in in place of an old wooden one, two wooden culverts rebuilt. The steam roller was used on the road one day. The full amount expended \$67.50

Charlotte road, there was three culverts rebuilt, bushes cut and some gravel put on in different places. The full amount expended \$35.00.

River road from Steamboat St. to Bog Brook church was turnpiked and partly graveled, the bushes were cut on Gardner's Hill, and all the large rocks removed from the road and ditch, four culverts rebuilt three stone and one wooden. The roller was used on the road two days. Full amount expended \$300.00.

Carson road was turnpiked the full length also the bushes cut, one culvert of wood rebuilt, and all waterways cleared out. The roller was used one day. Full amount expended \$41.00.

Bog Brook road was turnpiked from Mrs. Leighton's residence to Horace Glidden's place, one culvert rebuilt of wood. Roller used one day. Full amount expended \$26.00

Kelley's Hill on the Red Beach road was repaired to the amount of \$50.00. There was a large boulder in the ditch which turned the water in the road, this was blasted

COMMISSIONER'S REPORT.

and removed and a good ditch and waterway built to the foot of the hill, the hill was partly graveled. The work has proved very satisfactory.

Red Beach road from Kelley's Hill to Robinston line also Newton Shattuck and Quarry St., there was layed out \$700.00; there were two wooden culverts rebuilt, the hills were turnpiked and graveled, the work was done by hand, the road machine was not used at all, neither was the roller used as the culverts are not strong enough to carry it. This work was done by Red Beach labor.

Main St. near Ferry Point Bridge was repaired with crushed rock and gravel to the amount of \$25.00. Eaton St. graveled to the amount of \$15.00. Beach St. was covered with crushed rock and ditched, culverts cleaned out cost \$50.00. Carver St. graveled, cost \$15.00. 500 ft. of Lincoln St. was graveled, cost \$55.00. Lafayette St. graveled, cost \$15.00. King St. Milltown was repaired with crushed rock and gravel, cost \$25.00. Cleveland St. was graveled the full length, about 900 ft., cost \$25.00.

STATE HIGHWAYS.

Work was done in Milltown, beginning at South St. and continuing to Knight's Corner. The principal improvements made were in providing surface and sub-drainage, widening and straightening the road excavating ledge for side ditches, and surfacing with crushed stone. The quantities, amount of work and cost are given below:

Length of road improved,	2,100 ft.
Width of finished road,	21 ft.
Width of crushed stone surface,	21 ft.
Depth of crushed stone surface,	3 to 8 in.
Cost of grading 2,100 ft. at 5 4-10c per foot,	\$113.00
V drain, 150 feet,	\$79.00
Crushed stone, surfacing 4,910 sq. yds.	\$1,305.28

COMMISSIONER'S REPORT.

Reinforced concrete culvert, 2x2x46,	\$118.61
16 in. iron culvert, 46 ft. long,	\$96.83
14 in. iron culvert, 26 feet long,	\$54.73
One catch basin,	\$19.60
	<hr/>
Total,,	\$1,787.05
Less amt. received from Electric R. R.,	42.17
	<hr/>
	\$1,744.88

Set aside and appropriated by City, under section 4-5,	\$985.50
State aid under section 6,	\$739.12
Total cost,	<hr/> \$1,724.62
State aid approved,	\$739.12
Total cost to City,	<hr/> \$985.50

The work was done between Sept. 9 and Oct. 10, 1908
1,336 tons of crushed stone were used for surfacing
this road cost 75c per ton. The steam roller was used 28
days.

I think the state road work should be done earlier in
the season so the surface would become hard before the
fall rains come on. I consider this one of the best pieces
of road work ever done in the city. I would recommend
that the State road work done this year be continued from
Knight's corner towards Calais as far as possible.

SEWERS.

We built the sewer on Main St. this year from the N.
McGarry house to river leading past the Andrews Hotel a
distance of 415 ft., 335 ft. of 10 in. tile and 80 ft. of 8 in.
tile. There is eight catch-basins and one manhole. The
old wooden sewer had to be removed and the new one
lowered, This work cost \$341.77.

This completed the tile sewer from McGregor's store

COMMISSIONER'S REPORT.

to the river, a distance of 548 ft. I consider this a complete piece of sewer work, all the Engineer's plans and specifications are fully carried out.

There has been a plan made of this sewer and is now on file in the City Clerk's office.

Repair work and other small pieces of sewer work are as follows:

Repair wooden sewer on Franklin St. at cost of	\$4.00
Repaired wooden sewer on Lafayette St. near Albert Todd's residence, cost	\$10.00
Repaired wooden sewer on Munroe St, cost	\$18.00
Repaired wooden sewer on Main St near Hinckly Hill cost	\$10.00
Union St. Sewer was repaired to the amount of	\$15.00
We built one catch-basin on Barker St. near Dr. Webber's residence at a cost of	\$8.00
Repaired same sewer near shoe factory, cost	\$3.00
Built one catch-basin on Baring St. near G. Denison property, cost	\$11.45
Chase St. Sewer was repaired at a cost of	\$12.00
Rebuilt catch-basin near Calais National Bank, cost,	\$10.00
	<hr/>
	\$443.22

SIDEWALKS.

We removed 900 ft. of the wooden walk on King St. and built a gravel walk in its place, cost \$125.00

On North St. near McMann's store 200 ft. of the plank work was removed and a gravel walk built, cost \$38.00

We built 50 yards of concrete walk from North St. to Milltown P. O., cost \$32.50.

We also repaired the concrete walks in other parts of

COMMISSIONER'S REPORT.

Milltown. I will say the concrete walks in this part of the City are in very poor condition.

Nearly all of the concrete walk on North St. was repaired as it was worn out and broken up.

Other walks repaired when they most needed it. Laying out in asphalt work, \$3.50. There are several plank walks which should be repaired with gravel walks the coming season.

The sidewalk on Garfield St. was given a coating of crushed stone of the second grade from North St. to Lafayette, cost \$25.80.

Lincoln St. was graveled from South to Swan St. with beach gravel, cost \$16.00.

The wooden walk on North St. leading past the brick yard was straightened up, new timbered and repaired at a cost of \$80.00. Labor \$36.00, lumber \$44.00.

Union St. plank walks repaired at a cost of \$35.00 Labor \$10.00, material \$25.00

BRIDGES.

We rebuilt 100 ft. of the Upper Bridge in Milltown, at a cost of \$260.91. Labor, \$55.95; material, \$204.96.

The remainder of this bridge will have to be rebuilt this year. The work should be done as early as possible, as the bridge is in a very weak condition. There is about 100 ft. and I should judge it would cost about \$300.00 to repair it.

Union bridge was repaired to the amount of \$10.00. This bridge is in good condition.

Ferry Point Bridge will have to be repaired the coming season as the retaining wall next to Murchie's lumber shed has settled and partly fallen down. I should judge it would cost from \$200 to \$300 to make a permanent job of it.

COMMISSIONER'S REPORT.

The Red Beach bridge is not in very good condition, but I think it will go this year with very little expense.

The Maguerrewock bridge will need a new railing and should be graveled nearly the whole length.

The bridge on Franklin street will have to be rebuilt early in the season. The present bridge is built of lumber. I would recommend concrete or stone.

CULVERTS, ETC.

We built one corrugated iron culvert on Main St. near D. M. Gardner's residence at a cost of \$53.40. The Electric R. R. paying \$13.35. \$40.05.

We rebuilt stone culvert near Capt. Waite's residence cost \$10.00.

Rebuilt culvert of wood near Ed. Flynn's residence, cost \$10.00.

Rebuilt culvert of stone near Mrs. Dyer's residence, cost \$8.00.

Rebuilt culvert of wood near Mrs. Frank Hill's, cost \$5.00.

Rebuilt culvert of stone near Joel Osgood's residence, cost \$6.00.

Baring Road, one iron culvert, cost \$20.00. 2 wooden culverts, rebuilt, cost \$20.00.

Charlotte Road, repaired 3 wooden culverts, \$12.00.

Rebuilt stone culvert on North street, near Phelan's marble works, at cost of \$6.00.

The large stone culvert crossing Main street, near South, will have to be repaired as the water has got under one wall and is undermining it very fast.

SNOW BILLS.

It has cost \$280 to remove the snow and ice from the

COMMISSIONER'S REPORT.

streets and walks, outside of what has been done by the city teams.

The crusher has been run 36 days crushing about 2000 tons. 1,336 tons being used on the state road.

The steam roller was used 20 days on the state road and 8 days on streets and country roads. Cost \$3.75 per day for driver, fuel, etc.

INVENTORY OF PROPERTY.

1 steam roller, 2 road machines, 2 dump carts, 2 single trucks, 1 double truck, 2 street sprinklers, 5 snow plows, 1 sewer pump, 3 horse sleds, 1 sand sprinkler, 1 single horse roller, 1 sewer pump, 50 ft. land tile, 2 horses and harnesses, 1 set cornering moldings, 2 jack screws, 1 sythe, 4 grub hoes, 3 snow shovels, 5 shovels, 4 lanterns, 2 double speeders, 1 lighting block, 4 chains, 1 hand-saw, 1 steam drill, and fittings, 1 bellows, 1 anvil, 1 vise, 3 stone hammers, 4 pick axes, 1 wheel barrow, 2 man holes, 1 stone crusher boiler and engine, 1 portable boiler and engine, 50 tons crushed rock, 350 tons concreting sand and gravel, at mixing shed, 400 tons gravel at Milltown, 125 ft. of tile, of different sizes, 15 Y's 10 Z, 1 set concreting tools, 4 horse blankets, 1 card, 2 brushes, 1 wrench, 1 hammer, 1 wagon jack.

We have purchased 72 tons of gravel, from the Washington County R. R., at 40c. per ton, which is much cheaper than it can be hauled from the city gravel pits. You will see we have used more gravel this year, and less crushed stone. I think the crushed stone is the cheapest and is more satisfactory on our clay roads.

RECOMMENDATIONS.

I would recommend that there be some new curbing built this year. There is about 3000 ft. of old wooden

COMMISSIONER'S REPORT.

curbing in the city, which should be repaired with concrete. I would advise all culverts to be built of concrete, or corrugated Iron, either is much cheaper than wood.

The wooden sewer on Lafayette street should be abandoned and a new one built in the center of the street.

Munroe St. sewer will need some attention this year. Union St. sewer will have to be taken up and properly layed again.

The Red Beach road is in very good condition and will not need as much expense as last year. Some culvert work will have to be done.

COLLECTIONS.

Respectfully submitted

CHARLES V. GILLIS,

Chief Engineer Fire Department and Superintendent of Fire Alarm.

Calais, March 31, 1909.

BOARD OF HEALTH.

TO THE HONORABLE MAYOR AND BOARD OF ALDERMEN
CITY OF CALAIS:

Gentlemen: The Board of Health beg to submit the following report for the year ending this day.

The present Board consists of:

Percy L. Lord,	Term Expires	1909
Ernest A. Cranston,	" "	1910
A. G. Mingo,	" "	1911

During the year we have had an epidemic of Scarlet Fever. This disease was in such a mild form that, in many cases, it was almost impossible for even the physician to recognize it; there have been many cases where a physician was not called and the patient allowed to mingle with others and even sent to school; in this way the disease, for a time at least, got the better of us.

The Sand Bank schools were closed for two days fumigation, hoping in this way to get the disease under control; this was accomplished in a measure.

Diphtheria appeared near the Cottleville school and fearing some of the scholars had been exposed we closed the school for three days fumigation. Under the wise management of the attending physician assisted by the Board the disease was confined to one house.

There are today, several cases of whooping cough, one case of Typhoid Fever and one case of Scarlet Fever. There may be some cases which have not been reported to the Board.

The number of contagious diseases reported to the board during the year are as follows:

Typhoid Fever	10
Tuberculosis	5
Whooping Cough	4

REPORT OF BOARD OF HEALTH

Scarlet Fever	54
---------------	----

Diphtheria	8
------------	---

There have been 69 fumigations, as follows:

Typhoid Fever	5
---------------	---

Tuberculosis	3
--------------	---

Scarlet Fever	53
---------------	----

Diphtheria	8
------------	---

Several complaints have been made to the Board, some were so slight that no notice was taken of them, others were investigated and adjustments were made.

Respectfully Submitted,

ERNEST A. CRANSTON,

Secretary.

Calais, March 31, 1909.

CITY PHYSICIAN'S REPORT.

TO THE HONORABLE MAYOR AND ALDERMEN, CITY OF
CALAIS:

Gentlemen:—It is my pleasure to submit to you the following report as City Physician for the year ending March 31, 1909.

Respectfully Submitted,
ERNEST A. CRANSTON.

Calais, Me., March 31, 1909.

Sealer of Scales, Weights and Measures.

TO THE HON. MAYOR AND CITY COUNCIL:—

Gentlemen:—I hereby submit the report of my work during the past year; number of stores and places of business visited sixty; number of scales condemned three pairs weights seven.

I find during the past year that the scales are generally kept in better condition.

Respectfully, Submitted,
S. R. ASHFORD,

Sealer of Scales, Weights and Measures.

Calais, March 31, 1909.

Report of City Solicitor.

TO THE HONORABLE MAYOR AND ALDERMEN, CITY OF
CALAIS.

Gentlemen:—I herewith submit my report as city solicitor for the municipal year ending March 31st., 1909.

The action Melvina Huntington vs City of Calais, which was pending in the Supreme Judicial Court at the beginning of the year, was tried before a jury at the April Term of Court, 1908, and a verdict of \$350 returned for

REPORT OF CITY SOLICITOR.

the plaintiff; the case was taken to the Law Court on exceptions by the city, and argued at the December term, and decided in favor of the city.

There has been no other litigation during the year, and there is now no action pending in which the city is a party.

Respectfully yours,

HERBERT J. DUDLEY,
City Solicitor.

Calais, Maine. March 31st., 1909.

City Marshal's Report.

TO HIS HONOR THE MAYOR AND BOARD OF ALDERMEN:—

Gentlemen:—I herewith submit my annual report of Police Department for the fiscal year ending March 31, 1909.

J. R. N. SMITH,
M. R. MURCHIE,
H. T. POTTER,
Superintending School Committee.

Superintendent's Report.

TO THE HONORABLE MAYOR AND BOARD OF ALDERMEN
CITY OF CALAIS:

Gentlemen:—Herewith I submit my report as superintendent of the City schools for the year ending March 31, 1909.

SCHOOL BUILDINGS.

Our school houses are now in fair condition and will need little in the way of repairs for the coming year.

The changes at the Sand Bank school house have resulted in one of the most commodious and pleasant buildings in the city. A new heating apparatus is required in the building and the ground adjacent to the house should be turfed over.

An appropriation of \$600 ought to be enough for repairs, not including the above recommendations for the Sand Banks School.

TEACHERS.

During the year some changes have occurred in the teaching force.

Mr. A. A. Dennison of the Church Street school resigned during the summer vacation to take the position of supervising principal of the Grammar schools in Bangor.

We regretted to lose Mr. Dennison but he possessed qualities that secured for him a more advantageous career than we could offer.

Mr. Ralph M. Sawyer succeeded Mr. Dennison but resigned his position at the middle of the Winter term; since that time the school has been in charge of Miss Gertrude McKellar as principal, with Miss Alice Black, assistant in the ninth grade.

REPORT OF SUPERINTENDENT OF SCHOOLS.

The school is now doing good work and Miss McKellar deserves great praise for the results achieved.

The Milltown Grammar school under the management of Principal F. Wabert Bisbee is in excellent condition.

He has been ably supported by his assistants Miss Helen Greenlaw and Miss Augusta Cookson.

The High and Grammar school at Red Beach has been in charge of Mr. Wm. M. Cullen—he has given good satisfaction to the school board and the patrons of the school.

Miss Florence Phalen has assisted him in his work.

At the end of the winter term Miss Gertrude Short felt compelled to give up her position as principal of the South Street school. The resignation of Miss Short was greatly regretted by the School Board. She has been a faithful, conscientious teacher and has labored with good success in a rather hard school.

Miss Edith McKusick was advanced to Miss Short's place from the South Street Primary.

Miss Annie Coe, whose work at the Ford District was most satisfactory, was placed in the Primary school. It is believed that these changes will be found wise and the best course that could be taken under the circumstances.

Aside from these changes our teaching force is much the same as last year.

CONDITION OF THE SCHOOLS.

On the whole the schools are in a fairly good condition. This is especially true of the High school, which I believe to be doing excellent work.

My observation leads me to believe firmly in the wisdom of making courses of study elective in a High school such as we are able to maintain rather than separate subjects.

The courses of study in our High school are no more difficult than those pursued in any good High school.

REPORT OF SUPERINTENDENT OF SCHOOLS.

In order to complete their work properly the pupils must study from two to four hours out of school each day. And it is noteworthy that the pupils who study diligently at home avoiding in large measure parties and other social functions have as good health and get more real enjoyment out of their school days than do the pupils who study but little at home and indulge in amusements that mean late hours and often much excitement not to mention the successful completion of the prescribed work.

I am still of the opinion that Superintendent's examination should test the fitness of pupils for the High school.

The fact that it requires a careful mastery of the subjects taught in the grades in order to enter the High school is the strongest imaginable incentive not only to the pupils in the Grammar schools but to the teachers, as well, to do there best work.

On the other hand the admission to the High school of pupils not fitted to do the required work lowers the standard of the school and puts a premium on idleness and inefficiency all along the line.

TEACHERS' MEETING

Throughout the year teachers' meetings have been held each month during school terms. These meetings have been well attended and, I believe, with profit to the schools.

During the fall term a meeting of the County Association of Teachers was held in Calais and largely attended.

We were especially fortunate in having with us Payson Smith, State Superintendent of schools, Hon. N. A. Luce, a former state superintendent, Albert F. Richardson, Esq.

Owing largely to these gentlemen the meeting of the Association was a marked success.

TEXT BOOKS.

The changes in school books decided upon by the School Board have been completed by the adoption of

REPORT OF SUPERINTENDENT OF SCHOOLS.

Harris and Gilbert's Guide Book One, and Bartlett and McBain's Grammars.

The substitution of other readers, arithmetics, grammars, physiologies and geographies for those in use necessitated an outlay for school books much beyond the appropriation.

As the amount due for books at the beginning of the year was over \$300—the continuation and completion of this change has largely increased the amount outstanding.

But it must be borne in mind that this amount is not entirely due to a change of books. The books in use were in most cases in very bad condition as those can testify who saw the books at the city building, which had been collected from the different schools to be sent to the publishers in exchange.

Seven hundred dollars a year will not suffice to supply both common schools and High school with books. Nearly all of the books purchased have gone into consumption very soon after reaching the city.

Had no exchanges been made the replacing old worn books would have made a large overdraft. My experience and observation lead me to conclude that a thousand dollars a year will be little enough to supply our pupils with text books. In this computation is included the amount necessary for books used in the High schools.

COURSE OF STUDY FOR THE COMMON SCHOOLS.

The following course of study was adopted by the School Board after some deliberation. This is not submitted as a perfect course and, without doubt some changes will have to be made.

GRADE I.

Reading—The Ward System.

Follow directions in manual.

REPORT OF SUPERINTENDENT OF SCHOOLS

Use the blackboard for drill.

Teach carefully the sounds of the letters and combinations.

Do not neglect the backward pupils. The pupils should finish the Primer and the First Reader the first year.

Spelling—Begin to teach Spelling the nineteenth week of the School year. Teach at first the shortest words and those most frequently used.

Language—Read or tell stories which illustrate kindness, honesty, gentleness.

Give simple lessons in good manners.

Have the children construct sentences, using the names of persons or objects in the reading lessons.

Teach appropriate Memory Gems.

Number—Teach combinations of numbers from one to ten.

Count from one to twenty.

Teach the children the names of the ten figures.

Teach the meaning of one-half, one-third, one-fourth, using some object, as an apple, a strip of paper, or a line on the board.

Have the pupils get one-half of an apple or a line of a strip of paper. The same with one-fourth and one-third.

Writing or Printing—The last ten weeks of this year, have the pupils make the figures on the board; also the short letters a, m, n, o, etc.

All through the year pay particular attention to pupils who seem backward.

GRADE II.

Reading—Review Ward's First Reader.

Ward's Second Reader.

Give daily drills in the sounds of the letters—and of the phonograms given in the manual. Be careful to

REPORT OF SUPERINTENDENT OF SCHOOLS.

teach distinct articulation-and practice the pupils on combinations of letters apt to be sounded incorrectly as st, sts, ing, ic, ick.

Spelling—Spell all the words in the reading lesson—Make lists of common words, and have the pupils write and spell them.

Language—Read or tell stories-short and pointed-Stories of animals, or that teach truth or kindness. Have the pupils reproduce orally and sometimes in writing. Teach names of the comma, period, semi-colon, interrogation point, and use of period and question mark. Continue making of sentences and teach the use of capital letters at the beginning of sentences.

Teach the use of is and are.

Continue lessons in good manners.

Appropriate Memory Gems.

Number—Combinations of numbers to twenty.

Review first grade work.

Count to one hundred inclusive.

Write the figures---and numbers to one hundred inclusive.

Count by 2s to forty, beginning with 0.

Count by 2s to forty-one, beginning with one.

Add single columns, sum not to exceed twenty. Add two columns using not more than four numbers, sum not to exceed one hundred.

Teach the sign of addition giving it its proper name, and teach pupils how to arrange an example for addition.

Subtract---using numbers of one and two figures.

Review the fractions one-half, one-third, one-fourth—and give two-thirds, three fourths, two-fourths, one-fifth, two-fifths, three-fifths, four-fifths.

REPORT OF SUPERINTENDENT OF SCHOOLS.

Have pupils make these fractional parts of objects and lines—Have them get the fractional parts of numbers, as one-half of six men, one-third of twelve apples.

Teach gill, pint, quart, gallon.

Writing—Teach the careful writing of the figures and the letters.

Have the pupils learn the alphabet and make the letters—and combine them into words.

GRADE III.

Reading—Review last half of Ward's Second Reader—Ward's Third Reader.

Continue drill as in grade II—in the sounds of letters and strive to secure clear and distinct enunciation—Give much attention to correct and natural expression.

Spelling—As in grade II—Spell the words of the reading lessons.

Make lists of common words—such as the days of the week, names of the months, common articles of food, articles of clothing, parts of a house, common animals, etc.

Dictate words for the pupils to write.

Language—Teach correct use of is, are, were, was, am—Name the common punctuation marks, and have pupils make them.

Teach use of period, interrogation point, exclamation point.

Use of capital letters—names of persons—I and O—days of week--months--sentence--Common Abbreviations; Mr., Mrs., St., pt., qt., gal.

Read or tell stories—short and pointed, and have pupils reproduce them orally. Give instructions in good manners.

Have the pupils write short original stories on some

REPORT OF SUPERINTENDENT OF SCHOOLS

simple subject, once in two weeks. Correct and have pupils rewrite.

Pupils can describe a picture, or write a story about a pet dog or cat, or a picnic.

Memory Gems.

Number—Teach all the combinations in addition.

Count by 2s to one hundred beginning with 0.

“ “ “ “ one hundred one beginning with one.

“ backwards from sixty by 2s.

“ backwards from sixty-one by 2s.

“ by 3s to fifty-one beginning with 0.

“ by 3s to fifty-two beginning with one.

Count by 3s to fifty-three beginning with two.

Count backwards by 3s from fifty-one.—from fifty-two.—from fifty-three.

Notation and numeration.

Read and write number of 4 figures to 9999. Read numbers five figures. Teach use of L, V, X, to represent numbers, and write numbers by Roman method to thirty.

Give daily work in addition, subtraction—Add one, two and three columns, using as many as twelve numbers in a column.

In subtraction use numbers up to 9999.

Teach signs of addition and subtraction, giving correct names of each. Teach names of terms used.

Teach the pupil how to arrange his work.

Teach multiplication and division. In multiplication multiply by all numbers up to, and including twelve. Multiplicand not to have more than four figures.

Divide using the process of long division by all numbers up to, and including twelve. Teach the signs of multiplication and division, and the names of the

REPORT OF SUPERINTENDENT OF SCHOOLS

numbers used in the processes.

Teach sign of equality.

Review fractions, one-half, one-third, two-thirds, one-fourth, three-fourths, one fifth, two-fifths, three-fifths, four fifths and find fractional parts of numbers mentally—Review-gill, pt., qt., gal.

Teach qt., pks., bu.

Model examples—If one orange cost two cents, what will seven cost? five? eleven? nine? fifteen? twelve? Give many such changing the price, then the quantity. Use larger numbers for price.

Teach a simple form of analysis—Teach a way to represent the work by addition, by multiplication.

Writing—Give abundant practice on paper and at the board in making figures, and insist on excellent work. Commend good work. Show the pupils who fail to do good work where the trouble is.

Have them make the five signs until they do them well.

Have them write singly and in combination the letters of the alphabet, both capital letters and small letters.

Have them write sentences from dictation.

GRADE IV.

Reading—Ward's Fourth Reader--Other Fourth Readers--

Pay much attention to expression that shall develop the thought in the lesson. Daily drill in the sounds of letters, and in different combinations. Teach the discritical marks. Do not neglect the backward pupils.

Spelling---Rational Speller---Part one to page twenty-five.

Have pupils commit rules one and two, page twenty-

REPORT OF SUPERINTENDENT OF SCHOOLS.

two. Teacher should explain and illustrate these rules.

Language---Have stories reproduced by pupil. See that stories teach either truth or kindness, or something about animals or plants.

Use of capital letters---of punctuation marks.

Review use of is, are, was, were, am, and add there, their, these, them. Teach sentence---statement--- and question.

Teach noun and verb. Preserve one story each term for inspection. Memory Gems.

Number---Read and write numbers in the Arabic Notation to hundred millions.

Teach the letters of the Roman Notation, and write numbers to one thousand by that system.

Review counting by 3s forward and backward.

Count by 4s beginning with 0 to one hundred.

“ by 4s beginning with one to one hundred one.

“ by 4s beginning with two to one hundred two.

“ by 4s beginning with three to one hundred three

“ by 4s backward from 103, 102, 101, 100.

“ by 5s beginning successively with 0, 1, 2, 3, 4, to one hundred and beyond.

Count backward by 5s from 104, 103, 102, 101, 100.

Give abundant practice in addition and subtraction, using in addition columns comprised of one, two, three, four, five and six figures, up to sixteen numbers in a column—Use large numbers in subtraction to get abundant opportunity to teach “borrowing” and paying back.

In multiplication use numbers from two to four hundred ninety-nine for multipliers.

In division divide using the process of long division

REPORT OF SUPERINTENDENT OF SCHOOLS.

by all the numbers from two to two hundred ninety-nine.

Teach the five signs.

Name and define all the terms used.

Teach the fractions one-half, one-third, two-thirds, one-fourth, three-fourths, one-fifth, two-fifths, three-fifths, four-fifths, one-sixth, five-sixths, one-eighth, three-eighths, five-eighths, seven-eighths, and find fractional parts of numbers.

Model example—If three oranges cost fifteen cents, how many cents will one orange cost? nine? eleven? five? Make numberless examples until the pupils can give the result quickly—Analyze.

Model example—A boy went to the store with a one dollar bill. He bought a cap for fifty cents, a pencil for three cents, and a pound of coffee for thirty cents; how much change did he receive back?

White's first book in Arithmetic to page eighty-six.

Writing—Use Book one and two—Whitehouse system.

GRADE V.

Arithmetic—White's First Book, page eighty-six to page one hundred twenty-nine. Review from page forty-nine to eighty-six.

Notation and numeration.

Write numbers in Arabic Notation to hundred billions.

Roman notation letters and principles.

Write numbers to two thousand in Roman Notation. Count by 6s beginning with 0, 1, 2, 3, 4, and 5 to one hundred two and beyond one step, and back back by 6s from 107, 106, 105, 104, 103, 102.—Count in the same way by 7s.

Review counting by 3s, 4s, 5s.

(75)

REPORT OF SUPERINTENDENT OF SCHOOLS

Give practice in the four fundamental operations. Search out the inaccurate pupils and give them extra practice.—Multiply using numbers from 501 to 599 inclusive.

Divide by all numbers from 301 to 499 inclusive.

Oral combinations for quick work.

Spelling—Rational Speller. Part one, from page twenty-five to page forty-nine. Have pupils commit rules one and two, page forty-four, and rule three, page forty-five. Explain and illustrate. Review rules page twenty-two.

Grammar—Guide Book one, first part.

Review rules for capital letters, and punctuation mark. Review noun and verb---Give definition of each (McBain).---Add pronoun and adjective. Illustrate in sentences and have pupils select the nouns, verbs, pronouns and adjectives in sentences. Review sentence. Statement. Question.

Kinds of sentences—

Teach letter writing—The correct way to date and begin a letter—The closing of a letter—addressing the envelope.

Practice in punctuation—Place paragraphs on the board, and have the pupils supply capital letters and punctuation marks.

Write short stories each week—keep one each term for inspection.

Lessons in good manners. Memory Gems.

Geography—Frye's First Book—complete—Review carefully—See that the pupils get definite ideas as to the shape of the earth—motions of the earth—zones, boundaries of zones—equator—poles—Train in the cardinal points and half points---Teach the use of the map, and the cardinal points and half points on the map.

REPORT OF SUPERINTENDENT OF SCHOOLS.

Reading—Pupils should read every day—Have the lesson in geography read and spell important words. Practice in articulation—and the vowel and consonant sounds should be given daily.

Writing—Complete Book three—Whitehouse System. In this grade use topics, and have pupils provide suitable books—and teachers should examine frequently to see that they are properly kept.

GRADE VI.

Arithmetic—White's First Book, from page one hundred twenty-nine.

Review from page forty-nine.

In notation and numeration read and write numbers in the Arabic System to one hundred quadrillions.

Practice writing decimals to the sixth decimal order.

Review Roman Notation—letters and principles.

Write in Roman Notation to 10,000.

Count by 8's beginning with 0, 1, 2, 3, 4, 5, 6, 7, to one step beyond a hundred, and backward from 107, 106, 105, 104, 103, 102, 101 100. Review counting by 2's, 3's, 4's, 5's.

Teach G. C. D. and L. C. M.

Teach cancellation as a method of saving work.

Have the pupils solve problems on pp. 60, 61, 66, 67, 69, 73, 74, 75, 83, 84, 89, 90, 104, 105, 113, 114, 134, 135, 141, 146, 162, 170, 171, 172, 173.

Perform all oral and written work.

Give frequent practice in addition and subtraction.

In multiplication, multiply all numbers from 601 to 699, inclusive. In division divide by all numbers from 501 to 599, inclusive. Be sure that each pupil can name and define the terms used in the fundamental operations; that having any two they can find the third number in subtraction, multiplication and di-

REPORT OF SUPERINTENDENT OF SCHOOLS.

vision; that having divisor, quotient and remainder they can find the dividend.

Oral combinations for rapid work.

Spelling—Rational Speller, Part One, from page forty nine, and review work of first and second year. Have all pupils commit rules on page seventy six, and review rules on page forty four, and page twenty two. Have pupils recite rules orally, and also write them as a lesson for memory. Be sure that each pupil learns these rules and understands them.

Reading---Read the lessons in geography and the selections in the Language book, as well as from the Reader. Drill in pronunciation. Teach use of the dictionary and the discritical marks..

Grammar---Finish Guide book, No. one. See that the pupils can name and define the parts of speech, and select them from the sentences and paragraphs.

Have pupils make sentences to contain certain ones of the parts of speech, and mark the words that illustrate the desired part.

Teach subject and predicate definitely, and have the pupils select the subject and predicate from given sentences; also have them construct sentences and separate into subject and predicate. Have them select subject and predicate from the inverted sentences and imperative sentences. Have the pupils write compositions on simple subjects, such as "A Day at School," "A Visit to a Friend," "A Trip down River." Have them write a letter to the teacher and to a friend away, etc.

Geography—Frye's Geography. Complete second part.

Pay much attention to map drawing and have pupils draw maps from memory on the board.

Have them go on sea voyages, giving the direction

REPORT OF SUPERINTENDENT OF SCHOOLS

sailed, the waters crossed, the countries visited, and the cargo carried out in the vessel and the cargo brought back. Have the pupils tell about the people in the country visited, the climate, government and any peculiar customs. Have the pupils name continents and oceans in order of size. Be sure that each pupil can give the capital and form of government of each country studied; that they know the largest city in each country, and can tell what countries and waters are adjacent to the country.

History---Beginners' History. Read the entire book. Study carefully to Washington's Administration.

Teach with definiteness facts in relation to early discovery and settlement---nations engaged in early exploration---some explorers of each, and the first settlement of each.

Have the development of the thirteen original colonies and the causes of the American Revolution—leading officers of each part and the important events, and the results of the war.

Writing---Book Four---Whitehouse---complete.

Use topics in all studies. Have topic books provided by the pupil, and frequently inspected by teacher.

GRADE VII.

Arithmetic—White's Complete Arithmetic, to percentage.

Omit Art. one hundred seventy two to Art. one hundred eighty eight, and from Art. one hundred ninety three to Art. two hundred six.

In notation and numeration read and write numbers to quintillions.

Review Roman Notation and practice with large and small numbers, until the pupils can read and write numbers in both systems rapidly and accurately.

REPORT OF SUPERINTENDENT OF SCHOOLS.

Count by 9's forward to ninety-nine and one step beyond beginning with 0, 1, 2, 3, 4, 5, 6, 7, 8, 9.

Review counting by 6's, 7's, 8's, both forward and back.

Give frequent practice in addition and subtraction.

In multiplication, multiply by each number from 701 to 719, inclusive.

In division, divide by all numbers from 601 to 699, inclusive.

Perform all oral work within the required limits. Also written.

Analyze problems on pages 74, 75, 76, 77, 78, 79, 80, 81, 105, 106, 107, 108, 124, 125, 127, 128, 130, 132, 133, 134.

Oral combinations for rapid work.

Spelling—Rational Speller, part two, from page seven to page fifty one.

Review rules pp, 127-128.

Have these rules recited by each pupil.

Make lists of common words difficult to spell and give to the pupils for spelling lessons. Have the terms used in grammar and in important words in History, Geography, and Physiology spelled.

Reading—Read all the lessons in Geography and History and also from the Reader. Drill in pronunciation and in expression. Teach use of dictionary and the discriptal marks.

Grammar—McBain's Grammar to part two, page 101.

Develop the idea of the sentence. Begin the analysis of simple sentences, and the parsing of the parts of speech. Teach subject and predicate carefully, using all kinds of sentences and constructions.

REPORT OF SUPERINTENDENT OF SCHOOLS.

Give instruction in letter writing. Have them write business letters and items of news for the paper.

Teach them to make out a bill for work and for various articles. Teach them to write a promissory note, to write an invitation, and to accept or decline an invitation. Write compositions each fortnight to be corrected by the teacher and rewritten by the pupils.

Written on subjects assigned by teacher.

Geography—Frye's Grammar School Geography to page one hundred twenty nine. Continue map drawing, have maps drawn from memory on the board. Be sure that the pupils name the states in each group and give the capital of each. Have them bound the states. Have an order in which the states of each group are given and insist on every pupil using that order.

Be sure that the pupils can name the countries of North America, the coast waters, capes and peninsulars and mountain ranges, peaks, lakes and rivers, plains, plateaus and islands. Have them draw North America frequently and put in boundary lines, cities and other features.

History—Beginners History. Read the entire book. Study carefully, beginning with Washington's Administration. Review from first of book to Washington's Administration.

See that each pupil can name the presidents in order giving dates of each administration and numbers of terms served, and of what party.

Have them give one or more events of each administration; tell what ones died in office; what ones were assassinated, and who became president. Have them give the causes of the Civil War; the seceding states; the title of the government formed; the president and

REPORT OF SUPERINTENDENT OF SCHOOLS.

capital. Have them name and locate some of the great battles and name some leading officers on each side. Teach the Spanish War carefully, and be sure that the pupils understand why the United States engaged in the war and what islands became portions of this country or subject to its laws.

Physiology—Conn's First Book—Read and complete.

Writing—Complete Book five—Whitehouse.

Use topic books in all subjects. Pupils will provide suitable books, and teacher will secure careful preparation of the books by frequent inspection.

GRADE VIII.

Arithmetic—White's Complete Arithmetic—Begin at percentage and go to Ratio and Proportion—Take Art. 172 to Art. 177, and review from page seven to page forty-seven—Do all the oral and written work. Review counting by 9's beginning with 0, 1, 2, 3, 4, 5, 6, 7, 8, to ninety nine and one step beyond, and back from 107, 106, 105, 104, 103, 102, 101, 100, 99. Review counting by 2s, 3s, 4s, 5s, 6s, 7s, 8s, starting with 0, 1, etc., forward and back.

In notation and numeration have frequent practice--both systems of notation--in reading and writing numbers. Read and write decimal numbers. Do not omit work in addition.

Analyze problems pp. 184 to 194 inclusive; 197 to 202 inclusive; 209, 210, 211 and from page 262 to 274 inclusive.

Oral combinations for rapid work.

Spelling—Rational Speller--part two, from page 51 to page 91.

Review the rules for spelling.

Have the terms used in grammar, geography and physiology spelled.

REPORT OF SUPERINTENDENT OF SCHOOLS.

Make lists of words liable to be misspelled, and give them for spelling lessons. Do not neglect oral spelling.

Reading—Read the geography, history and physiology. Have the pupils read selections from the papers, and from standard authors to the school. Practice the selections until the pupils read them in a pleasing manner.

Grammar—McBain's Grammar--part two- page 101 to page 259. Review the definitions in part one.

Continue analysis and parsing.

Explain and illustrate noun in apposition, predicate noun, adjective, transitive and intransitive verbs, voice, and active and passive voice. Take up phrases and clauses, and explain how they differ from each other and from the sentence.

Develop the idea of the modifier. Show that all modifiers are either adjective or adverbial in their nature, that in poem they may be words, phrases, clauses.

Give practice in letter writing, and in such business forms as bills, promissory notes, receipts for money paid, invitations, etc. Have the pupils write news items--of happenings in town or at school.

Write compositions each fortnight, to be corrected by the teacher and rewritten by the pupil. Have pupils provide a note book in which corrected compositions are neatly written. Teacher will assign subject for composition.

Geography—Frye's Grammar School Geography, page 129 to 195 inc. Continue map drawing as in grade VIII. This year is devoted to the studies of countries outside the United States.

REPORT OF SUPERINTENDENT OF SCHOOLS.

Give the pupil definite idea as to the location of these countries, and how you would go to them from the United States. See that they know something of the people, the form of government and civilization—The principal products and climate should be considered. Sea voyages in which the pupil states the direction sailed, the waters crossed and the cargo carried should be given. It will make geography more vivid if the teacher calls attention in the class to events transpiring in various parts of the world, and has the news of the day read in the recitation.

What was said in grade VIII---concerning North America is pertinent to the study of each grand division.

History—Montgomery's Leading Facts—Read and study to Taylor and Fillmore's Administration.

Dwell with care on the period of early discovery and settlement, and the founding of the thirteen original colonies—Dwell upon the causes and results of the American Revolution.

Be sure that the pupils can locate the principal battlefields of that war, and the cities and towns mentioned--that they can name the principal officers and statesmen of the period and tell to which party they belonged.

Be equally careful in regard to the War of 1812, and the Mexican War.

Have the pupils write concise accounts of important events--and condensed accounts of the wars. Dwell upon important questions as the "Monroe Doctrine"--"Nullification"--the United States Bank—Call attention to the great invention of the period, and the statesmen, authors, etc.

REPORT OF SUPERINTENDENT OF SCHOOLS.

Physiology—Conn's Advanced Book—Read and complete.

Writing—Complete Books six and seven.

Use topics in each study.

GRADE IX.

Arithmetic—White's Complete Arithmetic. Begin at ratio, page 275, and complete the book, including the appendix. Take the review questions, beginning on page 321, and work them over until the pupils have mastered them. Explain and analyze the General Review problem, beginning on page 311.

Take Art. 172 to Art. 206.

Practice writing numbers in both systems of notation, and in reading numbers, simple and decimal.

Review counting by 2s, 3s, 4s, etc., starting with 0, 1, 2, 3, etc., forward and back.

Oral combinations for rapid work.

Review G. C. D. and L. C. M., and be sure that each pupil understands the process.

Spelling—Rational Speller, part Two, pp. 91.

Review rules of spelling. Review and teach diacritical marks and teach use of the dictionary.

Reading—Use the reading books provided for the grade.

Also read English and American History. Continue reading from local papers when important events are happening. Have the pupils read selections to the class or school that they have practiced.

Read the English History.

Grammar—McBains Grammar. Advance from page 259.

Review the whole book. Continue analysis and parsing. Take up all constructions not easily understood, explain and illustrate until pupils have mastered them. Dwell upon the use of the apostrophe to make the pos-

REPORT OF SUPERINTENDENT OF SCHOOLS.

sessive case, upon the comparison of adjectives and the formation of the plural of nouns. Continue the instruction in phrases, clauses, sentences. Teach the use of modifiers, that modifiers are either adjective or adverbial; that they are either words or phrases, or clauses. Continue work in letter writing, and in business forms. Write compositions each fortnight to be corrected by the teacher, and rewritten in composition book and preserved by the pupil.

These composition books must be frequently examined by the teachers to see that the papers are copied, and copied neatly. Teachers will assign subjects for compositions.

Geography—Frye's Grammar School Geography. Study New England States in last part of book. Review the book. Give abundant practice in map drawing.

Make special study of Canada, British Islands and the British Empire, Japanese Empire, The Holy Land, The Nile Valley, the countries that border the Mediterranean, Russian Empire and Chinese Empire.

Continue sea voyages as in eighth grade. Review carefully zones and their boundaries, widths and reason for; parts of continents in each zone and important countries. Products and animals in each zone. Be sure that pupils can define equator, axis, poles, meridian lines, meridian circle, parallels, tropics, polar circles, latitude and longitude. Have pupils learn latitude and longitude of some important place, as Cape Horn, Cape of Good Hope, North Cape, Strait of Gibraltar, London, Boston, Rome, Jerusalem, Tokio, San Francisco, Hong Kong, Mouth of the Amazon, Rio Janeiro, Valparaiso and Melbourne.

History—Montgomery's Leading Facts from Taylor and

REPORT OF SUPERINTENDENT OF SCHOOLS.

Fillmore's Administration. Review the book from the beginning. Have children learn Presidents in order, with the dates of each Administration and one or more important events. Study carefully causes and results of the Civil War. Be sure that the pupils can name the seceding states, the government formed, the president. Names given to the soldiers on each side, the leading generals, and important battles.

The pupils should draw maps of the states in which important events occurred and locate them carefully. Study specially The Monroe Doctrine; Nullification; Omnibus Bill; Wilmot Proviso; Dwell upon the great inventions (steamboat, telegraph, cotton gin, sewing machines, mowing machine, reaper, etc.) that have made the United States famous. Study important parts of English History.

Physiology—Review Conn's Advanced Book.

Writing—Book VIII, Whitehouse System.

Use topics in each study.

CITY SCHOOLS

Whole number of school buildings, 13.

Whole number of school rooms, 34.

High schools, 8 rooms.

Grammar schools, 15 rooms, grades 4 to 9.

Primary schools, 7 rooms " 1 to 3.

Suburban schools, 4 rooms " 1 to 9.

Teachers Employed—High schools, two principals, five assistants.

Grammar Schools, two principals, eleven assistants, five teachers.

Primary schools, seven teachers, three assistants, suburban schools, four teachers. Whole number of teachers thirty-nine.

This closes my final report as superintendent of schools. During my four years in office, certain results have been accomplished, which afford me much satisfaction.

The school building at Red Beach, has been remodelled and greatly improved, and is now well suited to the needs of that community.

The changes at the Sand Bank school, should gratify every true lover of our beautiful city. Its condition for many years had been a reproach to the city and a menace to the health of teachers and pupils. It is now a pleasant and comfortable building, as healthful in its interior arrangements and outside surroundings as any school building in the city.

REPORT OF SUPERINTENDENT OF SCHOOLS.

When I assumed the duties of superintendent the condition of the High school was very unsatisfactory—I set myself to make such changes as were needed to give the city an efficient school, in every way worthy of the name of High school.

The work of the High School is arranged in three courses—and courses not separate studies are elective—It was desirable to have each course in its way as valuable and as full of work as any other course and I think an examination of the courses of study will show that this result has been attained fairly well.

The arrangement of the courses of study was largely the work of Mr. Ralph M. Hunt and Mr. A. R. Butler at that time the principals respectively of the Calais High School and the Red Beach High School.

After its completion the course of study was submitted to competent authorities in and out of the state and was declared by every one whose opinion was asked to be an excellent course.

The adoption of the course of study for the High school by the superintending school committee, pleased me not a little, and I believe at present our High School is in most excellent condition, and deserving very high praise.

Another thing which affords much pleasure, is the removal of unsatisfactory text books and the substitutions of other books much better adapted to the needs of our schools. This is especially true of the adoption of Ward Method in reading. This is used now in all our primary schools and with most encouraging results.

A course of study for the common schools appears in this report. This course was prepared at odd moments as they occurred in a busy life and is, of course, imperfect

REPORT OF SUPERINTENDENT OF SCHOOLS.

and will need many amendments before it is such a course as our schools should have. It however affords definite and progressive work through the grades and is, I believe, practicable.

In conclusion I wish to say that the office of superintendent of schools—tho' exacting in many ways, afforded me much pleasure, and I shall ever look back with a certain degree of elation to the many happy hours passed in school rooms in the course of my visits, and to the pleasant relations existing between me and the teachers, and especially between me and the pupils. My professional duties require so large a share of my time and attention that I could not do for the schools all I desired.

I can, however, say that for four years the interests of our schools lay very near my heart, and all I did was done with an honest purpose. I regretted to differ, as I often did, with old and valued friends and neighbors, and only a sense of duty impelled me to stand steadfastly for certain things which I regarded, and still regard, as essential to the real welfare of the children and youth of our city.

I am a firm believer in districtsuperintendency and rejoice that a union of towns has been formed enabling us to secure for the responsible and important position of superintendent of Schools a competent man who can devote all his time and energy to educational matters.

I wish to express my strong sense of obligation to the city officials whose uniform kindness and ready helpfulness enabled me to perform my duties with the minimum amount of worry and friction; and to the teachers of the High and common schools whose courteous attention to my comments, and ready compliance with my directions made my relations with them more like that of friend and counsellor than that of superintendent or overseer.

ASHLEY ST. CLAIR,
Superintendent of Schools.

FREE LIBRARY AND READING ROOM.

For Year ending March 31, 1909.

TO THE HONORABLE MAYOR AND BOARD OF ALDERMEN
OF THE CITY OF CALAIS:

Gentlemen: The Trustees of the Free Library and Reading Room present the following report of the work of the year just closed and the present condition of the institution under their care and direction. Its service has been maintained without interruption throughout the year and some gratifying evidences have appeared of growing appreciation of its value in the public mind. Not only has there been an increase in the number of volumes used but a larger proportion of them have been books of a substantial character.

The library rules have been revised with a view to giving encouragement and larger opportunity for the taking of works of the higher orders of literature. Some valuable additions have been made to the department of books of reference.

Miss Vesta Moore who had rendered efficient and acceptable service as librarian for a period of over three years felt obliged by personal reasons to withdraw. Her resignation was reluctantly accepted by the trustees and in her place was elected Miss Julia L. Crocker who had pursued studies in library work during three years at Simmons College. Her work has been entirely satisfactory and it is hoped that her services may be retained. A "Children's Reading Hour" for boys and girls is held on Saturday morning of every week, the object of which is to interest young people in books of a better class than they might choose for themselves. The usual amount has been expended in the purchase of new books, but as it was found necessary to set aside an uncommonly large number of worn volumes the net increase of the library is less than in former years.

LIBRARY REPORT.

Number of volumes acquired by purchase,	258
“ “ “ “ “ donation,	14
“ “ “ Periodicals bound,	16
Total of additions,	<hr/> 288

The library now numbers about eight thousand, five hundred and fifty volumes, exclusive of public documents.

Number of books given out for home use	19 292
--	--------

“ “ readers in Reading Room,	9,430
------------------------------	-------

The trustees ask that the same appropriation made in recent years, viz. eight hundred and fifty dollars may be continued.

CHAS. G. McCULLY, President.

M. Bradish, Auditor.

Auditor's Report.

TO THE HONORABLE MAYOR AND BOARD OF ALDERMEN:

Gentlemen—I herewith present statements showing the appropriations and expenditures, receipts from taxes and all other sources for the year beginning April 1, 1908, and ending March 31, 1909. A statement showing the resources and liabilities of the city is shown on the balance sheet. The accounts as shown in the reports of the various departments have been compared with the city books and are certified correct. M. BRADISH, Auditor.

ORDERED, That the Mayor's Address be referred to the appropriate committee to consider and report upon its various recommendations, and that the usual number of copies, together with the reports of the several departments be printed in pamphlet form for distribution.

Attest:

S. D. MORRELL, City Clerk.

Calais, Apr. 12, 1909.

ORDERED, That the reports of the several departments for the past year as certified by the Auditor, be accepted and printed with the other reports in pamphlet form and the usual number bound in cloth for exchanges.

Attest:

S. D. MORRELL, City Clerk.

Calais, Apr. 12, 1909.
